

I am writing the FCC to comment on the possibility of LPFM replacing FM stations in some radio listening areas. I value and enjoy the programming that KLOVE Radio produces in my area. They are a positive and encouraging, family friendly radio station that is unavailable on any other FM station in my area. If LPFM replaced FM frequencies in my area and I was unable to receive the programming that KLOVE broadcasts I would lose a valuable support system for my family and my community. Since there is so much potentially inappropriate broadcasting that children could be exposed to in my area, if KLOVE were not available I would have no radio station to listen to with my children. My community would lose a valuable resource in encouraging children to make sound choices and show love and kindness to those around them if LPFM replaces FM and we are unable to receive KLOVE broadcasting in our area.
